SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is amending its regulations in parts 2, 9, 40, 50, 61, 71, 73, and 110 of title 10 of the *Code of Federal Regulations* (10 CFR) to make miscellaneous corrections. The amendments include correcting references, an address and a misspelling. The amendments will also make references to persons in one part of the NRC's regulations gender neutral. Future NRC miscellaneous corrections rules will amend other parts of the regulations for gender neutral references until all references have been amended. This document is necessary to inform the public of these non-substantive amendments to the NRC's regulations.

II. Summary of Changes

10 CFR Part 2

Correct Reference. In § 2.1200, this final rule removes the incorrect reference to § 2.101(f)(8) and replaces it with the correct reference § 2.101(e)(8).

10 CFR Part 9

Revise Nomenclature. This final rule revises all gender references in 10 CFR part 9 to include both male and female genders. Future miscellaneous corrections rules will revise additional male only gender references throughout 10 CFR Chapter I.

10 CFR Part 40

Correct Reference. In § 40.35(f), this final rule removes the incorrect reference ''§ 40.31(i)'' and replaces it with the correct reference ''§ 40.31(j)(1)–(4)''.

10 CFR Part 50

Correct Omission. In § 50.43(e), this final rule adds standard design approvals (SDAs) to the requirements for certain reactor applicants performing demonstrations or tests prior to NRC approval of the design, per the SDA content of applications requirement at § 52.137(b). The SDA requirements were discussed as part of the Statements of Consideration for the previous amendment to § 50.43(e); however, the addition was omitted from the regulatory text (72 FR 49352). This final rule corrects that omission.

Correct Reference. In § 50.55a(b)(2)(ix)(B), this final rule revises the rule language to correctly reference the relevant table. The table designation in Section XI, Division 1, of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code changed from Table IWA–2210–1 to IWA–2211–1 starting with the 2005 Addenda, which was approved for incorporation by reference in 2011 (76 FR 36232; June 21, 2011).

10 CFR Parts 61, 71, and 73

Correct Reference. Title 25 of the United States Code (25 U.S.C.) was reclassified and renumbered, which changed the location of some of the citations used in the NRC's regulations. These changes will update the citations used, but not make substantive changes. Title 25 U.S.C. 479a is now located at 25 U.S.C. 5130. Title 25 U.S.C. 450 is now 25 U.S.C. 5301; however, the actual section with the definition is 25 U.S.C. 5304.

Correct Address. In part 73, appendix A, the incorrect zip code ''30303–1245'' for Region II is corrected to read ''30303–1257''.

10 CFR Part 110

Correct Spelling. In part 110, this final rule removes all instances of the misspelled term ''terabequeral'' and replaces them with the correct term ''terabecquerel''.

III. Rulemaking Procedure

Under the Administrative Procedure Act (5 U.S.C. 553(b)), an agency may waive publication in the **Federal Register** of a notice of proposed rulemaking and opportunity for comment requirements if it finds, for

good cause, that they are impracticable, unnecessary, or contrary to the public interest. As authorized by 5 U.S.C. 553(b)(3)(B), the NRC finds good cause to waive notice and opportunity for comment on these amendments, because notice and opportunity for comment are unnecessary. The amendments will have no substantive impact and are of a minor and administrative nature dealing with corrections to certain CFR sections related only to management, organization, procedure, and practice. Specifically, the revisions include correcting references, correcting an address and correcting a misspelling. The Commission is exercising its authority under 5 U.S.C. 553(b)(3)(B) to publish these amendments as a final rule. The amendments are effective December 15, 2017. These amendments do not require action by any person or entity regulated by the NRC, and do not change the substantive responsibilities of any person or entity regulated by the NRC.

IV. Environmental Impact: Categorical Exclusion

The NRC has determined that this final rule is the type of action described in 10 CFR 51.22(c)(2), which categorically excludes from environmental review rules that are corrective or of a minor, nonpolicy nature and do not substantially modify existing regulations. Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

V. Paperwork Reduction Act Statement

This final rule does not contain a collection of information as defined in the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and, therefore, is not subject to the requirements of the Paperwork Reduction Act of 1995.

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the document requesting or requiring the collection displays a currently valid OMB control number.

VI. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, ''Plain Language in Government Writing,'' published June 10, 1998 (63 FR 31883).

VII. Backfitting and Issue Finality

The NRC has determined that the corrections in this final rule do not constitute backfitting and are not inconsistent with any of the issue finality provisions in 10 CFR part 52. The amendments are non-substantive in nature, including correcting references, correcting an address and correcting a misspelling. They impose no new requirements and make no substantive changes to the regulations. The corrections do not involve any provisions that would impose backfits as defined in 10 CFR chapter I, or would be inconsistent with the issue finality provisions in 10 CFR part 52. For these reasons, the issuance of the rule in final form would not constitute backfitting or represent a violation of any of the issue finality provisions in 10 CFR part 52. Therefore, the NRC has not prepared any additional documentation for this correction rulemaking addressing backfitting or issue finality.

14 CFR Part 21

[Docket No. FAA–2017–0851]

Airworthiness Criteria: Glider Design Criteria for DG Flugzeugbau GmbH Model DG–1000M Glider

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Airworthiness design criteria.

SUMMARY: These airworthiness design criteria are for the DG Flugzeugbau GmbH model DG–1000M glider. The Administrator finds the design criteria, which make up the certification basis for the DG–1000M glider, acceptable.

DATES: These airworthiness design criteria are effective December 15, 2017.

FOR FURTHER INFORMATION CONTACT: Mr. Jim Rutherford, AIR–692, Federal Aviation Administration, Policy & Innovation Division, Small Airplane Standards Branch, 901 Locust, Room 301, Kansas City, MO 64106, telephone (816) 329–4165, facsimile (816) 329–4090.

SUPPLEMENTARY INFORMATION:

Background

On May 18, 2011, DG Flugzeugbau GmbH submitted an application for type validation of the DG–1000M glider in accordance with the Technical Implementation Procedures for Airworthiness and Environmental Certification Between the FAA and the European Aviation Safety Agency (EASA), dated May 05, 2011. This model is a variant of the DG–1000T powered glider and will be added to existing Type Certificate No. G20CE. The model DG–1000M is a two-seat, mid-wing, self-launching, powered glider with a retractable engine and fixed-pitch propeller. It is constructed from carbon and glass fiber reinforced plastic, and features a conventional T-type tailplane. The glider also features a 65.6 foot (20 meter) wingspan and a maximum weight of 1,742 pounds (790 kilograms).

The EASA type certificated the DG–1000M powered glider under Type Certificate Number (No.) EASA.A.072 on March 17, 2011. The associated EASA Type Certificate Data Sheet (TCDS) No. EASA.A.072 defines the DG Flugzeubau GmbH certification basis submitted to the FAA for review and acceptance.

The applicable requirements for glider certification in the United States can be found in FAA Advisory Circular (AC) 21.17–2A, ''Type Certification—Fixed-Wing Gliders (Sailplanes), Including Powered Gliders,'' dated February 10, 1993. AC 21.17–2A has been the basis for certification of gliders and powered gliders in the United States for many years. AC 21.17–2A states that applicants may utilize the Joint Aviation Requirements (JAR)–22, ''Sailplanes and Powered Sailplanes,'' or another accepted airworthiness criteria, or a combination of both, as the accepted means for showing compliance for glider type certification.

Type Certification Basis

The certification basis is based on JAR–22, amendment 6, dated August 01, 2001. In addition to JAR–22 requirements, the applicant will comply with other requirements from the certification basis referenced in EASA TCDS No. EASA.A.072, including an equivalent safety finding.

Discussion of Comments

Notice of proposed airworthiness design criteria for the DG Flugzeugbau GmbH model DG–1000M glider was published in the **Federal Register** on September 21, 2017 (82 FR 44126). No comments were received; therefore, these airworthiness design criteria are adopted as proposed.
